Student Profile | STUDENTS MATRICULATED IN CREDIT-BEARING COURSES TOWARD A COLLEGE DEGREE

STUDENT ACHIEVEMENTS 2021–2022

Valedictorian Awarded Women's Forum Education Fund Grant

Hostos 2022 Valedictorian Bouampoundi Brigitte Thiombiano was awarded a \$10,000 unrestricted grant by the Women's Forum Education Fund to continue her education. The award recognizes extraordinary women over the age of 35 who have overcome extreme adversity to resume their education and covers costs associated with educational advancement.

Hostos Student Creates Animated Ad for Metropolitan Opera

Last holiday season, Hostos student Lisbeth Esteves was hired by the Metropolitan Opera to create a 30-second commercial promoting the Met's production of Cinderella. Her animated spot can be viewed on YouTube at "Holiday Magic at the Met."

Adeoti Named Semifinalist for Prestigious Scholarship

Hostos student Folusho Adeoti was selected as a 2022 semifinalist for the Cooke Undergraduate Transfer Scholarship. This year, the Jack Kent Cooke Foundation received more than 1,200 applications from students at two-year colleges across the country.

Hostos Engineering Student Awaits International Research Opportunity

Hostos student Jose Armando Keppis will be traveling to India as a participant in the CUNY India Pollution Study (CIPS) International Research Experiences for Students (IRES) National Science Foundation (NSF). At the Annual Biomedical Research Conference for Minoritized Students, he gave an award-winning presentation of his research project. While at the conference, he was also able to network and find resources for graduate programs and professional development opportunities. "My research with Dr. Yoel Rodríguez of the Natural Sciences Department focuses on a computational drug-discovery technique that may identify small molecules with high potency that could block the infection of the virus that causes COVID-19," he says.

Hostos Students Contribute to Published Research Study

Two students from Hostos — Scarlet Martínez Cardoze and Onyinyechi W. Obineche (above) — along with two students from Borough of Manhattan Community College (BMCC) collaborated on a research study titled “Small Molecules Targeting SARS-CoV-2 Spike Glycoprotein Receptor-Binding Domain” led by Professor José Fernández Romero from BMCC and the Population Council housed in Rockefeller University. While conducting their research, the team discovered three compounds that alone or in combination showed antiviral selectivity against SARS-CoV-2, the virus that has caused the COVID-19 pandemic. These compounds have been named HCC1, HCC4, and HCC11. HCC stands for Hostos Community College. The research, published by American Chemical Society Omega, was funded by the CUNY Community College Research Grant with support from the CUNY Research Scholars Program.

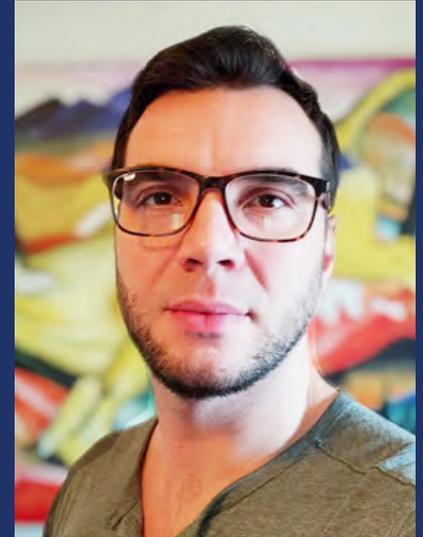

SCHOLARSHIP RECIPIENT SPOTLIGHT

Elizabeth Soto

Madrugá Family Fund for Financial Need and Extenuating Circumstances, Feiner Family Fund Scholarship for Extenuating Circumstances, Josephine Aguado Scholarship

Facing eviction from her apartment, single parent Elizabeth Soto and her 14-year-old relied on the Hostos Food Pantry for two months because they couldn't afford to pay for food. The scholarships Elizabeth received enabled her to stay enrolled and helped to pay for housing, food, transportation, and personal supplies. “I was able to stay because of that help,” she says.

Yavor Ivanov

Madrugá Family Fund Scholarship for Extenuating Circumstances, The Cocco De Filippis Family Scholarship, The Circle of 100

Dental hygiene students have full-time classes plus clinical hours. It leaves very little time to work. Before I received scholarships, I was considering taking a break from school to work for a while. Thanks to the scholarships I received, I was able to stay on track to graduate.”
